

# Visualising Live Code

computer music and art performance

Live coding is the practice of using computer programming to improvise an artistic performance for an audience. We are conducting a research performance that will combine music with visuals through programming. Come along to one of the two sessions to find out more about live coding and help with the research.

## 30th May 2014

Session 1 at 3:30pm and Session 2 at 4:30pm  
Building 108, CSIT, N101
