Visualising Live Code

computer music and art performance

xx/xx/2014

x:xx pm

Building 108, CSIT, N101

Live coding is the practice of using computer programming to improvise an artistic performance for an audience. We are conducting a research performance that will combine music with visuals through programming. Come along to help us with this research by filling out a short survey after the performance and find out more about live coding.
